Title: "E" Is for Discovery: Negotiating the Morass of Electronic Discovery

Description: Risk managers are often on the front line of insurance coverage litigation. They serve as an important liaison between company personnel and outside counsel. Discovery, if managed poorly, can quickly turn into a nightmare. As businesses embrace the paperless workplace, records are increasingly maintained electronically. A new set of electronic discovery amendments to the Federal Rules of Civil Procedure became effective in December 2006, and some courts have already approved rules or procedures governing e-discovery. We will explore the issues raised by e-discovery and highlight tips for saving time and money in managing such discovery.
